## Fluoride Varnish

Burkhart

Burkhart's Varnish is a 5% sodium fluoride varnish that seals the dentinal tubes to prevent hypersensitivity. It is sweetened with xylitol which inhibits plaque formation. Burkhart's Varnish also deposits calcium fluoride onto the tooth surface, which protects against acidic damage and promotes remineralization and contributes to the long-term health of the enamel, which protects against caries. It adheres well in the presence of saliva. The white color dries to a natural tooth shade. Its smooth, thin formula allows for ease-of-application without clumping. Single-use, pre-measured 0.40ml application with one brush applicator aids in asepsis and eliminates cross-contamination. Gluten-free.
