

# PPO Impact Analysis

## Dr. Joe Sample

**Estimated Active Patient Count: 707**

**Annual Patient Value: \$785**

Your PPO Analysis was created by comparing contracted fee plans to your full office fee schedule, weighted by the frequency usage of each code on your Procedure Code Report. This analysis provides an estimated adjustment percentage by plan. If provided to PST, you can also see the percentage of your patient base on each plan to better understand the exposure by contract. This analysis does not estimate downgraded services that will be unique by group within each plan. For a better understanding of this analysis, and next steps, please reach out to the Practice Support Team.
